Comments: Save the Tongass National Forest

Hello

In case, that i read that the US Government want to log the Forest and i hope, that the human race know that save the planet, save those unique places is our most important goal!

Then, when they are gone, the won't came back. And we have destroyed too much until today. It's time to wake up and help the nature and animals. Because the nature is the only reason why we are exist!

Thank you

Kind regards

Markus Schneider (Switzerland, European)
