Comments: Opening the Tongass Forest

To whom it may concern,

I am writing to let you know that I am TOTALLY opposed to opening up the Tongass National Forest in ANY way beyond what now exists. I believe this highly important environment and its existing watershed, which benefits millions of Americans and Canadians, should be left untouched and as pristine as it presently is. Altering this area, especially by the Trump administration which has exhibited continual disregard for aspects of the environment in order to benefit business interests, should not be permitted. I have yet to sense ANY interest in this administration in trying to find suitable balance points between the environment and business interests. Hence, I have zero trust that altering the rules will provide safeguards for the environment. Consequently, I support Alternative 1.

Sincerely,

Jeff Wersal-LaVelle
