Comments: SAVE the Tongass and Chugach for Our Future!

Dear U.S. Forest Service,

Wildlife, ancient trees, healthy waterways, carbon storage: all these and many other values need to be protected from the logging interests. America needs to WAKE UP to the crises that clear-cutting and other forest and habitat destruction are causing. Please do NOT eliminate "Roadless Rule" protections for the Tongass National Forest. Choose "No action" instead. And protect the Chugach as well. Forests like these are irreplaceable treasures!

PLEASE, Chief Christiansen, promote a big-picture, systemic, wholistic approach to our national resources. This is much larger and more important over time than corporate interests.

You can be a heroine, like other ethical public servants who are stepping up to do the right thing to protect our American values, which include foresightedness for our future needs and future generations.

Sincerely,

Janet Oslund

Tucson, AZ 85704
