Comments: Wilderness Fees

No more fees!

The Forest already has the Northwest Forest Pass!

No more fees!

You already have a congressional appropriation to manage the forest.

No more fees!

Try being creative first; develop low cost online education programs with a test component that must be passed before a permit issued.

No more fees!

The amount proposed is way too high and will impact many traditional user groups and discourage many non-traditional users completely.

No more fees!

The percentage of each permit charged by rec.gov is ridiculously high and completely unacceptable.

No more fees!

If you are not going to charge hunters to use the wilderness don't charge me!

No more fees!

If you are not going to charge fees for resource damage by high-impact, high-damage stock animals then don't charge me.

No more fees!

If you can't promise that 100% of any wilderness fee will support boots-on-the-ground and not more office staff, don't charge me.
