Comments: Recreation Fees and Limited Access in National Forest

I strongly disagree with both proposals. I am a 76 year old male, who believes that the forest and wilderness areas should be free to all individuals at all times.

I have been backing and using horses for the past 50 years in the California and Oregon Mountains. My tax dollars have already been used to support these activities and I do not believe you should be collecting additional fees from us again.

If the number of users per day needs to be controlled, I could somewhat agree.

Double dipping into my pockets is an unnecessary tax that I should be protected from at all times.
