Dear Willamette National Forest,

I am happy to see that collectively an effort is being made to promote generational enjoyment of our wilderness areas. Although I am not particularly happy about it, I support the permit system. In addition to the permit system I would love to see ongoing effort promoting leave no trace principles and education on the most sustainable ways to enjoy our public lands. I do ask that we explore other options in displaying our permit though. Printed material is an additional inconvenience. I believe that our community would benefit from some sort of electronic permit, especially for day use. I appreciate your efforts, see you on the trails!

Sincerely,

Jarrod Lummis
