Title:

Comments: SAR Access to Wilderness

Attn: Rec Fee

It would be advantageous if certified members of Search & Rescue teams could have spontaneous and unrestricted access to hike wilderness trails. This should include camping in areas not identified for limited entry. This would allow SAR members to become familiar with the trails including travel times and issues associated with access. Other advantages included, the potential to be in the area if a SAR event occurs, keeping up with current trail conditions and staying in shape.

Team member with  
Jefferson County Search & Rescue  
Camp Sherman Hasty Team
