Dear Willamette National Forest,

Recreation within Deschutes and Willamette National Forests' Wilderness areas has a positive impact on local Oregon communities. Many citizens choose to reside in places like Bend for the accompanying quality of life and the health benefits of outdoor recreation, including climbing, hiking, backcountry skiing, trail running, and other human-powered Wilderness-based activities. Burdensome and limited-entry permit systems could have an unintended economic impact on rural communities, local businesses, and the greater Oregon tourism economy. Recreation within Deschutes and Willamette National Forests' Wilderness areas has a positive impact on local Oregon communities. Many citizens choose to reside in places like Bend for the accompanying quality of life and the health benefits of outdoor recreation, including climbing, hiking, backcountry skiing, trail running, and other human-powered Wilderness-based activities.
