Comments: Dear God!!!!

We are in the middle of a Climate Crisis and it is extremely urgent that we no longer promote the use of fossil fuels and move as fast as we can to sustainable energy production. We know how to do it - now we need the political will.

To eliminate of protections of our wilderness in order to promote rail transport of "bomb trains", is insanity.

We are Oregonians and we protect our environment as we move toward sustainable energy. There is no room in our future plans for the ongoing promotion and support of continued use of fossil fuels or the decimation of our environmental laws. With due respect, I urge opposition to increased rail transport - and any other proposal to restrict the will of Oregonians.
