Title:

Comments: As I have indicated to you in the past, I totally object to any approval of the proposed Pembina LNG pipeline because of the past-stated injurious nature of such a project to our beautiful mountains and streams. As an avid fly fisher, I am very concerned about the unintended consequences of the proposed project on our fish population, particularly Federally protected Salmon and Steelhead Redds, as well as the overall quality of our rivers and streams to continue supporting a healthy fish population after such brutal intrusion.
