Comments: My comments specifically address the Bull and Jake Mountain area. The Mountain bike and equestrian trails are an essential part of this forest area. They are used throughout the year and provide an essential recreational opportunity for the many people that use them. The trails have been built, improved and maintained by volunteers involved in local mountain bike and equestrian groups. Improvement and/or expansion of these trails would be welcome however the trails in their existing condition and configuration are very adequate. I strongly advise making minimal changes in this area and keeping the natural and remote feel of this trail system intact.
