Comments: Dear Decision-makers,

I write in support of Alternative 1, keeping the roadless rule intact in Alaska, including the Tongass.

To me, the Tongass is most valuable for its role in keeping wild places wild, sequestering and storing carbon, and its opportunities for outdoor recreation. It also provides a myriad of other services, including clean air, water, and habitat.

The roadless rule was created based on the will of the American people you represent and work for - please don't add another exemption to this necessary management rule.

Thank you
