Title:

Comments: I strongly support Alternative 1 to keep the Roadless Rule in place for the Tongass. As a nearly 30 year resident of Southeast Alaska, I have witnessed first hand a myriad of changes to our fish and wildlife resources. One particularly distressing change has been the very sudden crash in king salmon populations. For years, Spring kings filled many freezers, and now that fishery has been completely shut down. The health of both our terrestrial and marine ecosystems depends on a healthy Tongass National Forest. It would be irresponsible and short sighted to add any additional stresses to this system. Please select Alternative 1 to support healthy fish, wildlife, and communities in Southeast.
