Subject: Roadless policy

To whom it may concern,

I just listened to a report on NPR regarding the reversal of the roadless policy in Alaska. Although, I have never been fortunate to visit Alaska, I am a life long resident of Minnesota, living on the edge of teh BWCA in Grand Marais. I urge the Forest Service to decide against opening protected areas to further development. It is our responsibility as citizens of this planet to protect our planet, preserving what is left of our undeveloped wildnerness for future generations.

Thank you,

Cathleen Nevers
