Comments: As a lifelong Alaskan I am in strong support of Alternative 1 which takes no action and would leave all of Alaska under the 2001 Roadless Rule, including the Tongass National Forest. I urge the administration to consider more long term needs of tourism over short term logging. Once old growth forest, trees that have been there for a thousand years, are gone, they are gone. Only 6% is remaining in the Tongass. It would be far better for our economy to exist sustainably into the future if we preserve this treasure now. Thank you for the opportunity to comment, and I urge my elected representatives and the federal administration to pass Alternative 1, no change to the 2001 Roadless Rule for the Tongass.
