Comments: Protect Tongass National Forest. Keep 'Roadless Rule' Protections for the Tongass National Forest

Dear U.S. Forest Service,

I strongly oppose the Forest Service's plan to eliminate "Roadless Rule" protections for the Tongass and Chugach National Forests, and urge you to select the "no action" alternative instead and to disallow logging and bulldozing. Climate change, wildlife protections, environmental ethics are just a few of my reasons.

Please - every snowflake in an avalanche is responsible. Your decisions will matter to the earth environment and living things.

Sincerely,

Teri Bridge
