Comments: No logging in the Tongass National Forest

U.S. Forest Service

RE: No logging in the Tongass National Forest

null

Docket Number: FS-2019-0023

The Tongass is a precious wildlife area. Rare 1000 yr old trees, wolf species, brown bears and bald eagles thrive there.

If tree logging and/or mining occurs within the Tongass area it will negative impact the area and threaten all this precious wildlife.

I urge you to not exempt any part of the Tongass from the Roadless Rule. We must preserve this unique and non-replaceable area.

Sincerely,

John Castanon
