Comments: In absolutely no way shape or form should be allowing further destruction of our old growth lands. We cannot let greed continue to tear this earth apart. When does it stop? When nothing is left? We need to be protecting more lands and finding alternatives to destroying the land that is left. Our oceans are filled with plastic, we are filling the earth with our trash, and all we want to do is destroy more of it, for what, GREED! It needs to stop.
