Last name: Waddick

Organization:

Title:

Comments: Please preserve and conserve Tongass National Forest. Do not allow deforestation, logging, road building, or mining. Please accept the leadership and stewardship of this national treasure by local Indigenous peoples.

Research shows that forest conservation protects our air and water. Research shows that local and Indigenous leadership is the best method to steward these land resources for long-term benefits for all taxpayers.

We all need this healthy ecosystem and the healthy communities in and around the Forest. Please do not allow exclusionary access to businesses; such businesses profit unfairly with no benefits to our precious ecosystems and communities.
