First name: Cindy

Last name: Heazlit

Organization:

Title:

Comments: I prefer alternative 1 - no changes. I am greatly concern formthencaves od Tongass. Road development guarantees that detrius will wash into the caves and change the ecosystem. His can happen miles away from the actual location of the cave.

Significant road development, logging, and mining also has the ability to change the local climate. Right. Ownwe need all the trees we can get to hold back warming.

Please leave Tongass as it is.
