Title:

Comments: Please DO NOT repeal the roadless rule in the Tongass. We have already clear-cut most of North America, and have vanishingly few old-growth forests left. I have a 10-month-old son; I would like for him to be able to experience the majesty of 1,000-year-old trees and untouched wilderness. This potential roadless rule appeal would destroy our wilderness heritage, not to mention destroy an important carbon store and disrupt an ecosystem that our salmon and tourist industries heavily rely on. Please maintain the roadless rule and preserve our heritage.
