First name: John

Last name: Smolko

Organization:

Title:

Comments: Lands like these have been given protected designations for a reason and once they are gone, cannot be replaced. There are places for industry and places that should be kept wild. Why are we continually willing to destroy places of cultural and environmental significance that support long term, sustainable natural resources, for the short term gain of a few. The Tongass should be fully kept under the protections of the Roadless Rule.
