Title:

Comments: I'm simply begging you to keep the Tongass National Forest roadless and protected as a national treasure of wild habitat. I will not state again the many reasons, published fully and eloquently elsewhere, listing the reasons why developing the forest is not to our economic advantage. I want to add my voice to the thousands who love that land, visit the area often as an ecotourist, and hope we as a people have the wisdom to protect those lands.
