Title:

Comments: I do not support ending the roadless rule in the Tongass National Forest. This is going backwards. We have developed our tourist industry and it will be destroyed if the beauty of the Tongass is destroyed. Fishing/salmon streams will also be destroyed if this "project" proceeds. And most importantly, this is the last temperate rain forest left in the world and contributes enormously to controlling the climate crisis we now find ourselves in. Our glaciers are melting at rapid rates, villages are moving inland from our coastlines, AK is dramatically changing before our eyes and logging the Tongass will increase the change in our entire ecosystem. Please do not end the Roadless Rule!

Thank you,

Shawn Hatt Cohen
