First name: Dakota

Last name: Keller

Organization:

Title:

Comments: Please protect and prevent any development of any kind of the Tongass. In a world constantly expanding with development and harvesting of resources, it is now more important than ever to keep wild and untouched lands, untouched. Having space that is void of roads and human presence is essential for science, freedom to exist, and respect to wildlife and generations of people to come. Actions such as these cannot be undone and to open this land to development would be to ignore all that we've learned from history. Entities that have the power to decide what happens to this land also have the responsibility and duty to protect it regardless of private interest. As an organization of the federal government, please have the self respect to support and preserve spaces that exemplify freedom in the truest sense.
