Last name: Gabelein

Organization:

Title:

Comments: My name is Steven Gabelein and I live in Juneau, AK. I have lived in Southeast Alaska for 7 years in both Sitka and Juneau. The natural abundance of trees, fish, and wildlife is why I live here and supports my passion of hiking, hunting, and fishing. I am writing a comment on the Alaska Roadless Rule DEIS because I am concerned with how the Rule and the proposed full exemption will impact my fishing, hunting, subsistence harvesting, foraging for wild foods, the peace and solitude I find in nature, recreating, practicing my culture, the status of the Tongass as a national and global treasure, the forest's ability to sequester carbon and mitigate climate change impacts, the conservation of resources for future generations .

Out of the alternatives described in the AKRR DEIS I support alternative 1: no action. It shows the Forest Service is responding to the needs and voices of Southeast Alaskan communities. I depend on roadless areas in the Tongass National Forest for viewing wildlife, keeping public lands wild for future generations. A full exemption does not protect these values, nor does it effectively balance economic development and conservation of roadless area characteristics. A full exemption from the Roadless Rule and increased logging and roadbuilding will negatively impact the Tongass and what I and many others use and depend on the forest to provide for us.

The Roadless areas on the Tongass that are especially important to me are those on or around Admiralty Island, Baranof Island, Chichagof Island, the northern mainland above Port Snettisham (around Juneau), Kuiu Island, Kupreanof Island, all of the inventoried roadless areas on the Tongass Yakutat forelands, Revillagigedo Island (near Ketchikan), Prince of Wales Island, Wrangell and Etolin Islands, the southern mainland from Bradfield Canal to Dixon Entrance the central mainland from Hobart Bay to Stikine River. I want the roadless areas in these locations to stay in roadless status in any alternative selected by the Forest Service, and be managed to provide for the uses and activities I listed above. It is important to me that the T77 and the TNC conservation priority areas retain their roadless protections.

I do not support the Forest Services preferred alternative of a full exemption. A full exemption is not in the interests of Southeast Alaskans who live in and use the Tongass National Forest, because I believe that Alternates 1, 2, or 3 seem logical and reasonable. It seems that Alternates 4, 5, and 6 are not necessary and against the vast majority of Southeast Alaskan residents wishes.. The State of Alaska says that a full exemption is needed for rural economic development opportunities. However, a full exemption would not help create more rural economic development opportunities, it would instead harm our existing rural economies that are based on the visitor industry and commercial fishing industry.

It would further harm rural economic opportunities because pursuing the same outdated economic model of old growth clearcut harvesting for export stifles innovation and possibility in other sectors, such as mariculture, sustainable young growth harvest, and rural agriculture. If the Forest Service wants to support rural economic development, they should devote resources to support our fishing and visitor industries transition to second growth logging improve and streamline existing permitting processes for important community projects rather than rehashing old conflicts.

Finding a sensible and reasonable action on the Roadless Rule should be straight forward based on the feedback received from Alaskans.

I urge the Forest Service to prioritize the voices of Southeast Alaskans over those of our political representation and corporate interests. Choosing a full exemption will not create a long lasting, durable solution for roadless areas on the Tongass. It will only increase the legal challenges, uncertainty for businesses, and conflict on the Tongass going forward.
