Comments: My partner and I are both relatively new residents to the state of Alaska and have felt privileged to be able to share this amazing place with the others who live here. Both of us moved here from down south after finding great opportunities for career and personal advancement in Juneau. Both of our jobs are related to the outdoors and tourism. We fear that if Alternative 6 (a full exemption from the roadless rule) is sought, jobs like the ones that brought my partner and I here may be at risk. They depend on the pristine natural environment that makes Southeast Alaska such a special place. These jobs are renewable, desirable, and the future. Unlike logging old growth forests which is not renewable and is short sighted. Keeping our pristine natural environment is the best investment possible for the future of Southeast Alaska's people, economy, and way of life. That is why we support Alternative 1, which would leave all of Alaska under the roadless rule.
