Comments: No to Fracking!

I am writing as a concerned U.S. citizen and an enrolled member of an Oregon Tribe.

The practices of fracking are devastating to the lands. I have seen many articles on this practice, and how it ruins lands, water, and is a ruinous practice.

I ask you do not approve any devastating practices to the lands any further, your short sighted planning creates many years of devastation. As a taxpayer I don't support this move by your agency. I feel we suffer enough from mis-management of our public lands by your agency, and many companies who come here to alter the landscape, create problems with poisons, and interrupt our tribal societies religious practices, gathering traditions, and alter our traditional use of these lands, which are are all tribal lands to begin with, and we keep being put upon by poor planning.

No to fracking!!! No!!!
