First name: Kimberly

Last name: Piper

Organization: NYU Center for Bioethics

Title:

Comments: The justification for this proposed rule is inappropriate, harmful and outright false. Allowing this would be an injustice to millions. Please, have some decency and protect our land. The voice of the people needs competent leaders and thinkers with moral backbones, not another economic / utilitarian mongrel that seeks to undermine and dictate our future well-being, our relationships with the Earth and our relationship with the United Nations (because this rule defies current climate agreements).
