First name: Tonya

Last name: Levy

Organization: Individual

Title:

Comments: The Trump Administration is misinformed. Stop the destruction of trees in our National Forests. Specifically please preserve Tongass National Forest. These trees represent a large part of the future "lungs" of our world. With our the Sitka Trees that hold billions of tons of carbon there is hope for natural cleansing of our air.

Aren't you people supposed to have experts reassuring future life on the planet? Do you still believe in stewardship, and leaving the planet better than you found it?

I am disgusted by the greed of Donald Trump and all of those who believe in him for their own greed. Planetary Genocide in action via Sonny Perdue, and the Trump Administration Secretarys who are NON EXPERTS at anything, other than conning people and grifting off of them.
