First name: Mike

Last name: Larson

Organization: Mr.

Title:

Comments: Please do not allow the harvesting of our Tongass and all other public lands. This will only profit a few. We all have a stake in this to preserve these lands for future generations. We have plenty of places to access these products not appeasing the loudest or influential. Hemp could solve the need for much of this demand and put a lot more people to work in industry and provide another market to our farmers. As stewards of future generations, we need to be responsible.
