First name: Laura

Last name: Bethard

Organization: ms

Title:

Comments: Are you insane? You are going to push us right off the climate cliff - we are releasing carbon far faster than we can lock it back into the earth. We need these forests as a carbon sink far more than logging companies need a short-term financial gain. Frankly, we ought to be expanding preserved areas, not handing them off to special interests. Absolutely do not proceed with this reckless waste of a public good.
