Last name: Miller

Organization: retired

Title:

Comments: Teddy Roosevelt is spinning in his grave. Millions of Federal Land were set aside to provide hard working Americans a place to feel the power of Nature. Animals, waterfalls, forests, National Parks. He did so to avoid land grabs and destruction of a pristine environment and for our citizens feel closer to God. Now, our government is stepping all over this intent. Fracking? Harvesting of trees? No. The parks and Federal lands are for OUR ENJOYMENT, not sold to commercial interests. My family and I have been to 7 National Parks. If you have ever seen the sunrise over Bryce Canyon, you would know exactly what teddy Roosevelt meant.
