Last name: RUSTEMEYER

Organization: Individual

Title:

Comments: Stop the insanity of destroying forests that are keeping the human race and the other participants in the web of life alive and thriving. The greed and ignorance of this proposed action are horrifying and will only lead to more of the same. These forests contribute our health daily and one only needs to visit to feel the impact, if reading science-based studies is not sufficient. Please, please stop this action. These are the people's lands and should benefit all peoples of our country, not the few who will profit. We need nature . The picture of a denuded landscape that will result is an injury we all will bear.
