Comments: I am APPALLED by the attempt of the Trump administration to profit from tearing apart the Tongas National forest. I know that they aren't a fan of science (or even reality), but this is INSANE. We need MORE old growth trees, the LAST thing humans should be doing when so much of the planets forests are on fire is cutting them down!

I am DISGUSTED by this administrations blatant disregard for science, and their LIES. It's abhorrent. TREES REMOVE POLLUTANTS from the air, they actually clean the air so its breathable. Without old growth forests to support life profits don't matter!

DO NOT ALLOW the Tongas to be torn down!!!!!!!!
