First name: Phillip

Last name: Ozmun

Organization:

Title:

Comments: Its the forestry departments job to manage forestry, not farm it out to create jobs when possible under the current political leadership. Im indifferent when it comes politics. Republican or Democrat, the forestry departments job shouldnt change. It should be non-partisan and act in the best interest of the land, not the best interest of people. While the department says they will create jobs and use resources wisely, they always destroy the land and leave the government in the red instead of creating wealth. Stop the cycle. Do not log this forest.
