Comments: Well well well, this is a sad and sorry piece of business for the Tongass. And it is amazing that the USFS always has the wrong plan at the wrong time. Perhaps it is just a rude coincidence that just as the planet is seriously falling apart climate wise, you goofs now want to make it ten times worse by more massive old growth deforestation of roadless areas in the Tongass . But I suppose we can add this effort to the rest of the criminal forest plans of the USFS .Plans like 'Central Tongass plan' ,or 'Big Thorne Plan ' or any of the other fiascos of the last 35 years. Yes, there is no 'Honor' to be found in the halls of the USFS. And now you have a lot of gibberish on why we must now finish off the scattered roadless areas that were busy minding their own business while serving the needs of alaskans. And the corrupt manner in which this whole mess was handled, with the final 'Decision ' being made on the front end of the process, instead of on the end. Why should I bust my guts to provide a super detailed rebuttal of your gobble-de-gook reasoning so as to be written off with the other 140000 comments you find it useful to ignore. No, your agency is a downright disgrace. Oh , oh, I almost forgot, how could I forget something so, so, so, important ? I Joseph Sebastian, being of sound mind, despite the hopeless and demoralizing corruption of this "Exemption" plan being railroaded thru, I got to, vote for the NO ACTION ALTERNATIVE!!!!!!!!!! Is that clear enough? Thankyou ever so much, for your kindness and consideration of marking up my choice of all those wonderful and soul stirring alternatives. SEE YOU IN COURT !!!
