Title:

Comments: This is a horrible idea that makes no sense, as we are in the midst of a worsening, human-created climate crisis!

Our National Forests are vital to absorb carbon and provide life to millions of animals and humans, as Nature intended and designed.

Men have no business cutting down trees and ramming roads in our National Forests for profit!!

Every scientist is calling the alarm how we are destroying the earth! Protect wilderness and the animals - leave them alone!

Scrap this crazy plan immediately.

Thank you.
