Title:

Comments: I am a 10 year old i am in 4th grader me and my class are learning about national parks. I don't agree that you should cut down the trees because we need them to help us with the mistakes we made that ended up with climate change. If you cut down the trees you are destroying animals home and how would you feel if some stranger came into your home and kicked you out. trees eat the carbon dioxide and give oxygen. there are plenty other jobs people can have. please don't cut down the trees.
