First name: Dotty

Last name: Caldwell

Organization:

Title:

Comments: The Tongass National Forest needs to be left alone. Adequate and correct information is important when making this decision, so I strongly encourage you to make sure it is used in the final decision. Also, if the trees are cut, the carbon released may contribute enough to climate change that the proper conditions for regrowth of the forest will be impossible. Please fully respect the web of life and do not aggravate an already tenuous global situation by making it even worse.
