Comments: Please DO NOT ALLOW THE LNG Pipeline to cross Oregon! In addition to violating private property rights, the pipeline threatens our rivers, streams, groundwater, and well water when the pipeline leaks! Pipelines leak - sooner or later.

In addition, there is a risk of explosion and wildfires in the event of a pipeline fracked gas leak. Oregon already struggles with wildfires, let's not increase the risk!

Pembina is a Canadian owned company. Why isn't Pembina taking the fracked gas to the Pacific Ocean via Canada? Could it be that the Canadian people and Canadian government will not allow them to cross Alberta and British Columbia?

I see no reason for Oregonians to take on the risk of a fracked gas pipeline, so that a Canadian company can profit by selling gas to China!

JUST SAY NO TO THE LNG Pipeline!
