Comments: #NoLNG BLM Protest

I use these BLM lands for recreation, including hiking, birding and horseback riding, and the pipeline would directly interfere with those uses.

I oppose the BLM amending their land use plan.

The current management plan was passed with taxpayer money and should not be thrown out to accommodate the fossil fuel industry.

The pipeline would cross old forest that are among the best in the world for carbon sequestration.

The State Director's decision is in error because the BLM knew of the proposed pipeline when it established its current Resource Management Plan. Hence, the BLM should not re-designate their Land Management Allocations to facilitate fracked gas pipeline construction.

I have voiced my concerns that this pipeline would have on public lands by commenting through the FERC process. Once again, I am using the public process to convey my concerns through an administrative protest to the BLM over its proposal to re-designate my public forest lands as a permanent give-away to a fossil fuel corporation.
