Comments: Support Alternative One

Dear USFS,

For the health of our wilderness, I support alternative one. The roadless rule is vital to preserving some of the most incredible natural forests in our nation. The ancient forests of the Tongass are important for carbon capture, and logging this old growth forest would cause irreversible damage to the landscape. I urge you to protect our wild places instead of letting loggers turn a quick profit at everyone else's expense.

Thank you,

Dr. Kareem Hannoun
