Title:

Comments: Alternative One

I do not want renewed road building or logging in the Tongass National Forest, or in any national Forest.

We need our Forests for our own survival.

We need our Forests to support diverse wild life.

We need our forests to help reduce carbon emmissions and to make clean oxygen.

We need our forests for the people's enjoyment and sanity.

We absolutely do not need to destroy our forests for a small number of private business to make a quick profit.

Once destroyed our forests do not return not in our life time not in generations to come.

Easter Island is a prime example of where ignorance meets greed Which led to the demise of a once forested island which had catistrophic implications for the local civilization. We are not ignorant anymore, now we must choose to not be greedy.

- a very concerned citizen
