Title:

Comments: No roads

Hello:

Please don't ruin our forests because of this short-sighted policy. I would like if you kept the Tongass roadless and forested.

There are far too many problems with this proposal including the subsidy to prepare roads to the logging areas, the impact it would have on surrounding wildlife, and the loss of a thousand year old rain forest. Our government officials should be protecting these areas, not allowing industry to squander our inheritance.

Thank you,

James Milano
