Comments: Tongass national forest proposal

This is Daniel McCarthy from Minnesota. I would support proposal number one. The Tongass is a very unique place on earth. We have so little true roadless wilderness left. Once we put a road in it changes forever. You cannot undo that. Especially old growth forest. 100 years from now will future generations regret our decision today if we open up that special place for logging and development. My states Boundary waters canoe area is a testament to that. There was a proposal to put a road through the middle of it and resorts 80 years ago. Today it is one of the most heavily used national wilderness areas in the country. Let's leave the Tongass, this one special place as it is. Future generations will thank us. Sincerely Dan McCarthy
