Comments: Tongass

Logging a 800 year old forest while the world is struggling with immense global warming/change is the unbelievable foolish.

DO NOT ALLOW LOGGING OF TONGASS.

The destruction of the forest between Cape Yakataga and Icy Bay from the Logging is terrible.

I've personally flown over the area for 18 years now working with tourism.

Every tourist in Alaska who sees this logging has been appalled and disgusted.

It will take 800 years to regrow these trees. DO NOT LOG THEM.

Focus instead on tourism industry and the infrastructure it.

This will create a significantly broader and longer income base for the state.

Thank you.

Ben Gray
