Comments: against the Tongass Exemption from the Roadless Rule

Through the years, the public support for the Roadless Rule in SE Alaska has been overwhelming. We all support the the 2001 Roadless Area Conservation Rule. Industrial logging of the roadless areas will degrade many regional economic drivers, the environment, fish and wildlife habitats.

All this for money for the administration and his supporters, doing great harm to the environment and subsidizing round log exports to China. ???? I pray that these people will realize the damage they are doing to our earth and if not, that we get rid of them as quickly as possible before they destroy our children and grandchildren's heritage, a gift given to us by the Creator.
