Comments: No new roads or logging in the Tongass, please

I just wanted to let you know I choose Alternative One, which is that I do not want renewed road building or logging in the Tongass National Forest. The existing giant, ancient trees are important for the planet in terms of carbon storage, and the roads would damage the salmon fishery and that the 1000 year old trees can't be replaced once gone.

I care about this area and the planet. Please do not allow this.

Thank you.

Laura
