Comments: I choose Alternative 1 for Tongass

Hello,

In reference to opening up the Tongass National Forest for old growth logging I support Alternative 1.

I would like the government to take no action and to leave Alaska under the 2001 Roadless Rule. This would include not logging the Tongass National Forest. I do not want logging to be done because these trees are important to locally fisheroes and are important stores of Carbon.

Also, please be aware if the Tongass National Forest is affected under the Trump administration this will only increase the chances that I will never vote Republican.

Thank you very much.
